

**ACADEMY OF SCIENCE OF BOLOGNA INSTITUTE**

Via Zamboni, 31

**June 27, from 4:00 PM to 5:30 PM**

**THE FUTURE OF ARTIFICIAL INTELLIGENCE**

*The last several years have brought rapid advancements in machine learning to a wide range of applications including robotics, recommendation engines, and video synthesis. These technologies are upending many assumptions about what might be possible. B Cavello draws on their diverse experiences from IBM Watson to the halls of the United States Congress to explore how these recent innovations are reshaping our relationships with technology, society, and even the nature of truth.*

**Introduction**

**Pierluigi Contucci**, *Full Professor of  
Mathematical Physics, University of Bologna*

**Lecture**

**B Cavello**, *Director, Emerging Technologies, Aspen Digital*

**Comments**

**Giusella Finocchiaro**, *Full Professor of  
Private Law and Internet Law, University of Bologna*

**Michela Milano**, *Full Professor of  
Computer Science, University of Bologna*
